

Muhammad-Tahir Sanuth

Front-End Engineer

Lagos, Nigeria (Remote) · Mtz5prif@gmail.com · (+234) 810-234-2878 · GitHub: Muhammad-Tahir-S

SUMMARY

Front-end engineer with ~4 years of professional experience building and maintaining **React** and **TypeScript** SaaS and workflow web products remotely for international teams. Strong in **UI implementation, frontend architecture, component and integration testing**, and collaboration with design and product. Delivers production features on large enterprise monorepos for **Codygo** client products (Addressable, Datafy, Worknet, and related tooling); led frontend delivery at **ZeroComplex AI**; recent **Tempo** contract shipping workflow and incident-management UIs. Positioning for **senior frontend IC** roles while official Codygo title remains Front-End Engineer.

PROFESSIONAL EXPERIENCE

Codygo — Front-End Engineer

Aug 2022 – Present · Ramat-Gan, Israel (Remote)

Codygo builds and maintains full-stack TypeScript SaaS applications for clients (codygo.com). Client work appears under client GitHub orgs (addressable-io, datafy-io, codygo-solutions).

- Delivered consistently **high-quality front-end work across three client products in parallel** (Addressable, Worknet AI, and Datafy).
- Maintain frontends for **Addressable** (~1.8 years), **Worknet AI**, and **Datafy** (~6 months each)—pixel-perfect UI, application architecture input, and **component/integration tests**.
- Ship production changes on a large **React, TypeScript, Tailwind CSS**, and **Vite** monorepo: **multi-tenant UX, campaign workflows**, and **analytics/dashboard** surfaces.
- Landed production fixes via team PR process on addressable-io/a9e-mono (tenant switching, campaign edit guardrails, dashboard and analytics UX).
- Extended **Datafy** cloud-ops UI (datafy-io/frontend-mono): log/volume table UX, tags-column tooltips, date-range and chart label formatting, and related data-surface improvements.
- Built **QuickBooks Desktop integration** UIs and adapters—forms, entity query APIs, error handling, and test coverage (codygo-solutions/qbdt-adapter-client, qbdt-adapter, quickbooks-adapter).
- Implemented **Jira ↔ GitHub sync** (fetch and upsert issues) (codygo-solutions/jira-github-sync).
- Shipped **AI product UI**—embeddable widget login/metric components and form controls (codygo-solutions/codygo-ai-widget-mono).
- Contribute to Addressable full-stack work to a lesser degree: **AWS serverless, MongoDB, PostgreSQL**.

Stack: React, TypeScript, Tailwind CSS, Vite, Jest, Next.js (product-dependent), Storybook, AWS (serverless), MongoDB, PostgreSQL

Tempo — Front-End Engineer (contract)

Mar 2025 – May 2025 · Remote · tempo.new

Prompt-driven design and development platform ([Tempo](https://tempo.new)). Contract delivery under metzinc/* repos.

- Shipped workflow **designer/canvas** features—node config forms, template save/delete, panel layout, dark theme (metzinc/workflow-designer-20250425).
- Implemented **authentication** for incident apps—JWT, Supabase, server actions, token redirects (metzinc/Tempo-Main-Incidents).
- Developed **Next.js workflow runtime** and **full-stack incident/kanban** experiences on metzinc/workflow_nextjs_20250520 and metzinc/tempo-full-stack-incident-mgmt (commits under org git identity; attributed per engagement scope).
- Built a **full-stack internal work-tracking dashboard in two weeks** for Tempo delivery coordination.

Stack: Next.js, TypeScript, Tailwind CSS, Supabase, workflow/canvas UI

Collabscape — Front-End Engineer (via Bexxle Technologies)

Jul 2024 – Jul 2025 · Lagos, Nigeria (Remote)

- Delivered **Collabscape** social product flows—create/edit post APIs, filters, and integrations (Bexxle-Technologies/collabscape-mono-repo).

ZeroComplex AI — Front-End Lead

Aug 2023 – Apr 2024 · Lagos, Nigeria (Remote)

ZeroComplex AI integrates AI into businesses through custom AI workflows.

- Led frontend delivery from design through production for workflow-oriented web applications for a **team of three**.
- Partnered with product management to **plan sprints**, **review designs**, and **assign frontend work** across the team.
- Ran **code reviews** and **pair programming**; co-planned application architecture with backend engineering.
- Owned **end-to-end testing** and quality assurance for **weekly releases**.
- Supported **weekly investor demos** for **12 weeks** with stable, presentation-ready product UI.
- Built with **Next.js** (App Router and Pages Router), **TypeScript**, and **Tailwind CSS**.

Pramie Technologies — Front-End Developer

Feb 2022 – Jan 2023 · Lagos, Nigeria (Remote)

- Built client web applications to spec using **React**, **Next.js**, and **TypeScript**.
- Collaborated in a **7+ developer** team to develop and maintain **Bloco**.
- Executed migration of the Bloco website to a new version.
- Maintained the **First Active 365** website.
- Participated in peer **code reviews**.

CodingBlindspots — Front-End Developer (Intern)

Aug 2021 – Dec 2021 · India (Remote)

- Implemented React feature requests against product designs in a remote internship.
- Delivered UI fixes including navigation, API integration paths, and comment-thread styling.

YK-Networks — Front-End Developer (Intern)

Apr 2021 – Jul 2022 · Lagos, Nigeria

- Built **React** components to match client design system specifications.

SELECTED PROJECTS

Feedback Forum — Full-stack feedback application

TypeScript, React · Muhammad-Tahir-S/Feedback-Forum

- Built post create/list/sort flows and iterative filter UX (including inline date filters).

Personal portfolio — Marketing site

TypeScript · Muhammad-Tahir-S/portfolio

- Improved responsive layout, contact integration, and server/client rendering consistency.

Ascent — Data visualization UI

TypeScript · Muhammad-Tahir-S/Ascent

- Implemented leaderboard cards and chart components (including Nivo integration and view-transition experiments).

EDUCATION

Federal University of Agriculture, Abeokuta — BSc, Electrical and Electronics Engineering

May 2015 – Jan 2021 · Abeokuta, Nigeria

Cambridge A Levels — Science

Nov 2014 · Abeokuta, Nigeria

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Chakra UI, Styled Components, Redux, MobX, Storybook

Testing & quality: Jest, end-to-end testing, ESLint

Data & APIs: GraphQL, Chart.js, Firebase, REST integrations (QuickBooks, Jira)

Platform & tools: Git, GitHub, AWS (serverless exposure), MongoDB, PostgreSQL, Supabase

Practices: Component-driven UI, design-system alignment, accessibility-aware UI, workflow/canvas UX, code review, remote collaboration

INTERESTS

Creative writing, editing, football, table tennis, illustration, manga/manhwa, anime, fantasy novels
