PROFESSIONAL EXPERIENCE

Codygo

Aug. 2022 – Present

Front-End Engineer

Ramat-Gan, Israel (Remote)

- Codygo provides high-quality full-stack typescript development and maintenance of SaaS applications (codygo.com).
- I actively maintain the frontends of three different applications: implementing pixel-perfect UI designs, planning optimal application architectures, and writing tests for components and integrations.
 - 1.8 years developing of [the Addressable product](#), 6 months each developing the [Worknet AI](#) product and the [Datafy product](#). (Stack: React, Typescript, Tailwind, Vite.)
 - Involved in, admittedly to a lesser degree, the backend development for the Addressable product. (Stack: AWS serverless, MongoDB, Postgres).
 - Learning new technologies to further personal skills and solve more complex issues at the company.

ZeroComplex AI

Aug. 2023 – Apr. 2023

Front-End Lead

Lagos, Nigeria (Remote)

- ZeroComplex AI streamlines the integration of AI into businesses, enhancing their existing digital infrastructure through custom AI Workflows. ([ZeroComplex AI](#)).
- Coordinate and oversee the evolution of products from design to live applications.
 - Outline sprints with product management team; sign off on designs with product team; coordinate and assign tasks to frontend team.
 - Code reviews and peer programming. (Stack: Next.js—app and pages router—Typescript, Tailwind.
 - Plan application architecture along with backend team.
 - End-to-end testing/quality assurance.
 - Demos with prospective investors.

Pramie Technologies

Feb 2022 – Jan 2023

Front-End Developer

Lagos, Nigeria (Remote)

- Build web applications with React/Next.js and Typescript according to client's designs.
 - Worked in a team of 7+ developers to develop and maintain [Bloco](#).
 - Implemented the migration of the Bloco website to [a new version](#).
 - Maintained [the First Active 365](#) website.
 - Peer code-reviewing.

CodingBlindspots*Front-End Developer (Intern)***Aug 2021 – Dec 2021***India (Remote)*

- Implement feature requests with React.
