

Muhammad-Tahir Sanuth

Full-Stack Engineer

Mtz5prif@gmail.com ❖ (+234) 810-234-2878 ❖ Lagos, Nigeria

SUMMARY

5 years of experience building TypeScript, React, and Next.js applications for international B2B SaaS teams. Specializes in analytics dashboards, design-system implementation, data visualizations, and component and integration testing.

PROFESSIONAL EXPERIENCE

Codygo - codygo.com

Full-Stack Engineer

Aug. 2022 – Present

Ramat-Gan, Israel (Remote)

TypeScript SaaS consultancy delivering client web products

- Delivered front-end work across Addressable, Worknet AI, and Datafy in parallel—architecture input, FigmaSpec UI, and component and integration tests on React, TypeScript, Tailwind CSS, and Vite monorepos.
- Built and extended a Chakra UI design system—buttons, inputs, typography, tables, tooltips, and shared layout primitives used across product surfaces.
- Shipped Addressable campaign workflows, multi-tenant UX, and analytics dashboard surfaces; added server-side table operations, pagination, and API-backed report views.
- Extended Datafy cloud-operations UI with log and volume table UX, tags-column tooltips, and date-range and chart label formatting.
- Built QuickBooks Desktop integration UIs and adapter coverage—entity create, update, delete, query, and change flows with error test cases.
- Implemented Jira-to-GitHub sync for internal tooling and embeddable AI widget UI with login, metrics, and form controls.
- Resolved platform issues—post-authentication Lambda warmup, S3 and database report-file sync, auth integration, and runtime environment fixes.

Stack: React, TypeScript, Tailwind CSS, Chakra UI, Vite, Storybook, Jest, Cypress, Next.js, REST, AWS (serverless), MongoDB, PostgreSQL

Collabscape

Front-End Engineer (via Bexxle Technologies)

Jul. 2024 – Jul 2025

Lagos, Nigeria (Remote)

Social product for content creators.

- Delivered authorization flows, social account connections, calendar grid, and rich post-creation interface on a TypeScript monorepo.

- Integrated sign-in, sign-up, and create and edit post APIs with calendar and event-detail UI. Shipped homepage, filter UX, and post-form connections to calendar views.

Stack: React, TypeScript, REST, Git

Tempo - tempo.new

Full-Stack Engineer

Mar. 2025 – May 2025

Canada (Remote)

Prompt-driven design and development platform.

- Shipped workflow designer canvas features—node configuration forms, template save and delete, panel layout, and dark theme.
- Built a full-stack internal work-tracking dashboard in two weeks for delivery coordination.
- Developed Next.js workflow runtime and full-stack incident and kanban applications.
- Refactored incident-management UI with Radix UI primitives; implemented JSON Web Token (JWT) and Supabase authentication flows.
- Resolved CORS, token encoding, auth logging, and environment configuration around the auth flow.

Stack: Next.js, TypeScript, Tailwind CSS, Radix Supabase, React, REST

ZeroComplex AI - zerocomplex.ai

Front-End Lead

Aug. 2023 – Apr 2024

Lagos, Nigeria (Remote)

Custom AI workflow web applications.

- Led front-end delivery for a team of three on Next.js AI-integrated apps—code reviews and pair programming.
- Partnered with product to review designs, plan sprints, and ship weekly releases with presentation-ready UI for twelve weeks of investor demos.
- Co-planned improved front-end architecture for Doculess with backend team.
- Owned end-to-end testing and quality assurance for weekly release cadence.

Stack: Next.js, TypeScript, Tailwind CSS, React, design systems, REST

Pramie Technologies – pramie.tech

Front-End Engineer

Feb. 2022 – Jan 2023

Lagos, Nigeria (Remote)

- Built client websites and web applications to specifications with React, Next.js, and TypeScript in a seven-developer team.
- Executed Bloco event-ticketing platform migration—full UI revamp and API optimizations for version two.

- Maintained First Active 365 website with peer code reviews.

Stack: React, Next.js, TypeScript, Tailwind CSS, Git, REST

YK-Networks

Apr. 2021 – Jul 2022

Front-End Engineer (Intern)

Lagos, Nigeria (Remote)

- Built React components to match client design system specifications.

Coding Blindspot

Aug. 2021 – Dec 2021

Front-End Engineer (Intern)

India (Remote)

- Implemented React feature requests against product designs in a remote internship.

SELECTED PROJECTS

Feedback Forum — Full-stack feedback application

TypeScript, React github.com/Muhammad-Tahir-S/Feedback-Forum

Ascent — Data visualization UI

TypeScript · github.com/Muhammad-Tahir-S/Ascent

EDUCATION

Federal University of Agriculture, Abeokuta — BSc, Electrical and Electronics Engineering

May 2015 – Jan 2021 ♦ Abeokuta, Nigeria

Cambridge A Levels – Science Nov 2014 ♦ Abeokuta, Nigeria

SKILLS

Languages and frameworks: JavaScript, TypeScript, HTML5, CSS3, React, Next.js, Tailwind CSS, Chakra UI, Radix UI, Vite, Storybook

Testing and quality: Jest, Cypress, end-to-end testing, ESLint

Data and APIs: Chart.js, GraphQL, REST integrations (QuickBooks, Jira)

Platform and tools: Git, GitHub, Figma, AWS (serverless exposure), MongoDB, PostgreSQL, Supabase, Express, Node Js, Drizzle, Prisma
